Breathing Light

Separate Design

- The scheme of separating the filter element from the water tank is adopted, and the water is pumped and sprayed by the water pump, so as to achieve the effect of humidification. It effectively avoids the breeding of bacteria due to the filter element soaking in water for a long time.
- The evaporation filter element has the functions of anti-bacterial, anti mildew and anti odor.
- This product has been sold exclusively in the domestic market
- Export countries: South Korea, Russia, EU, USA, etc
- It has passed CE / KC / ROHS certification
