

KJ400G-B

HOUSEHOLD AIR PURIFIER

TOWER-TYPE

PM2.5 sensors / display

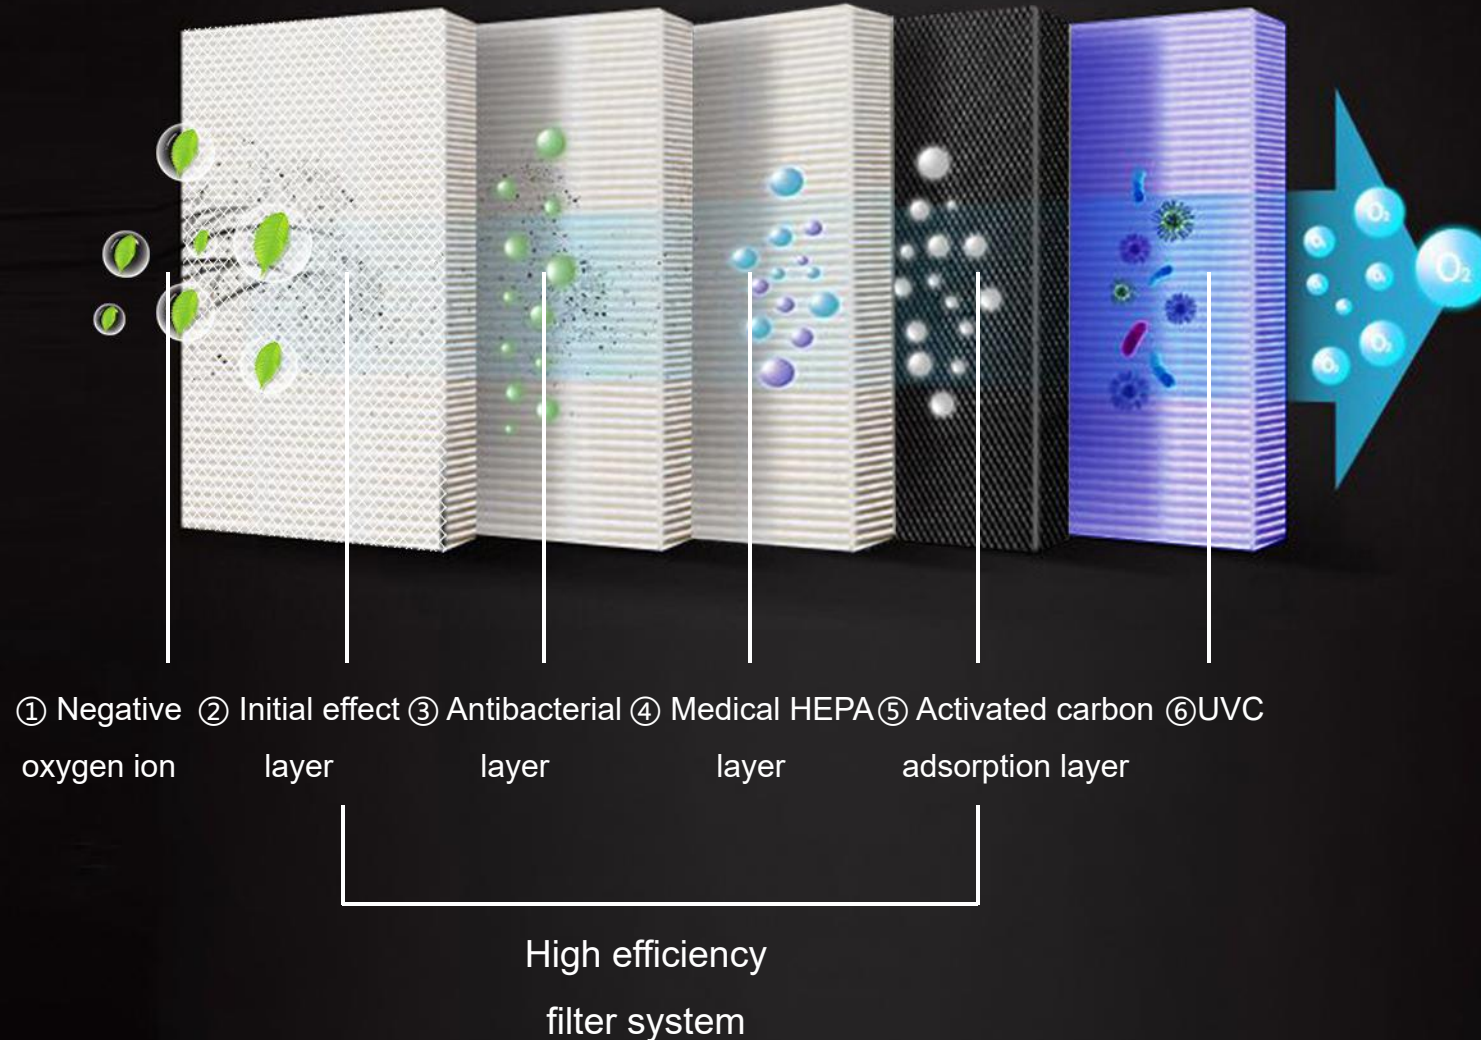

B type air purifier is equipped with PM2.5 sensors to accurately monitor air quality and detect indoor air quality. It is specially designed for newly made furniture, newly decorated home and new office environment.

Comprehensive • purify every corner of the space

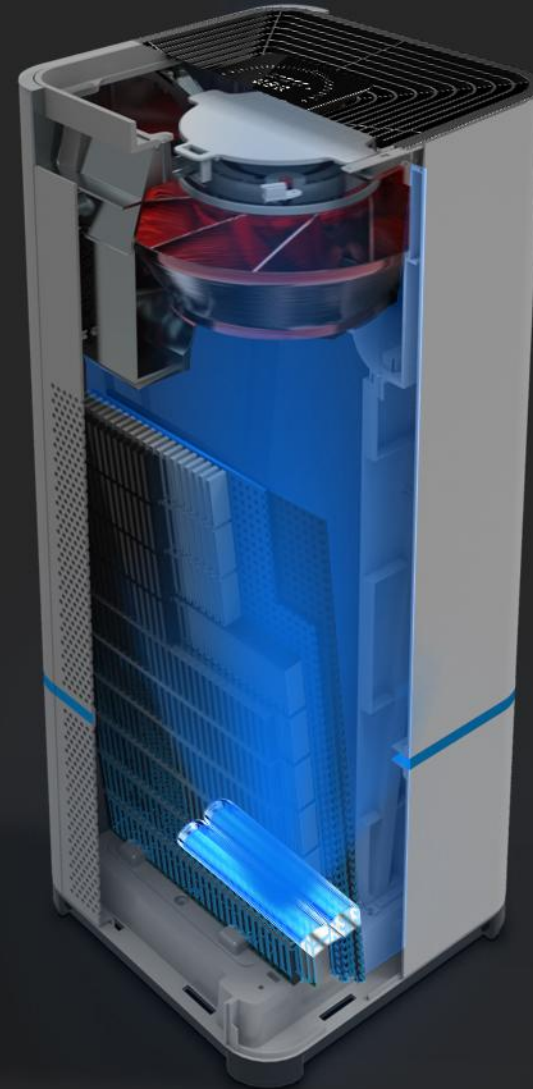

Home air purifier, suitable for 28-48 square meters of indoor space use, such as: small family home, bedroom, study, office, conference room, etc. The machine is equipped with efficient and strong motor, and the inclined wind wheel forms a new 360° circulation airflow, which can purify every corner of the indoor space.

Full effect purification and elimination, three major pollutions in one step

Cold cathode ultraviolet

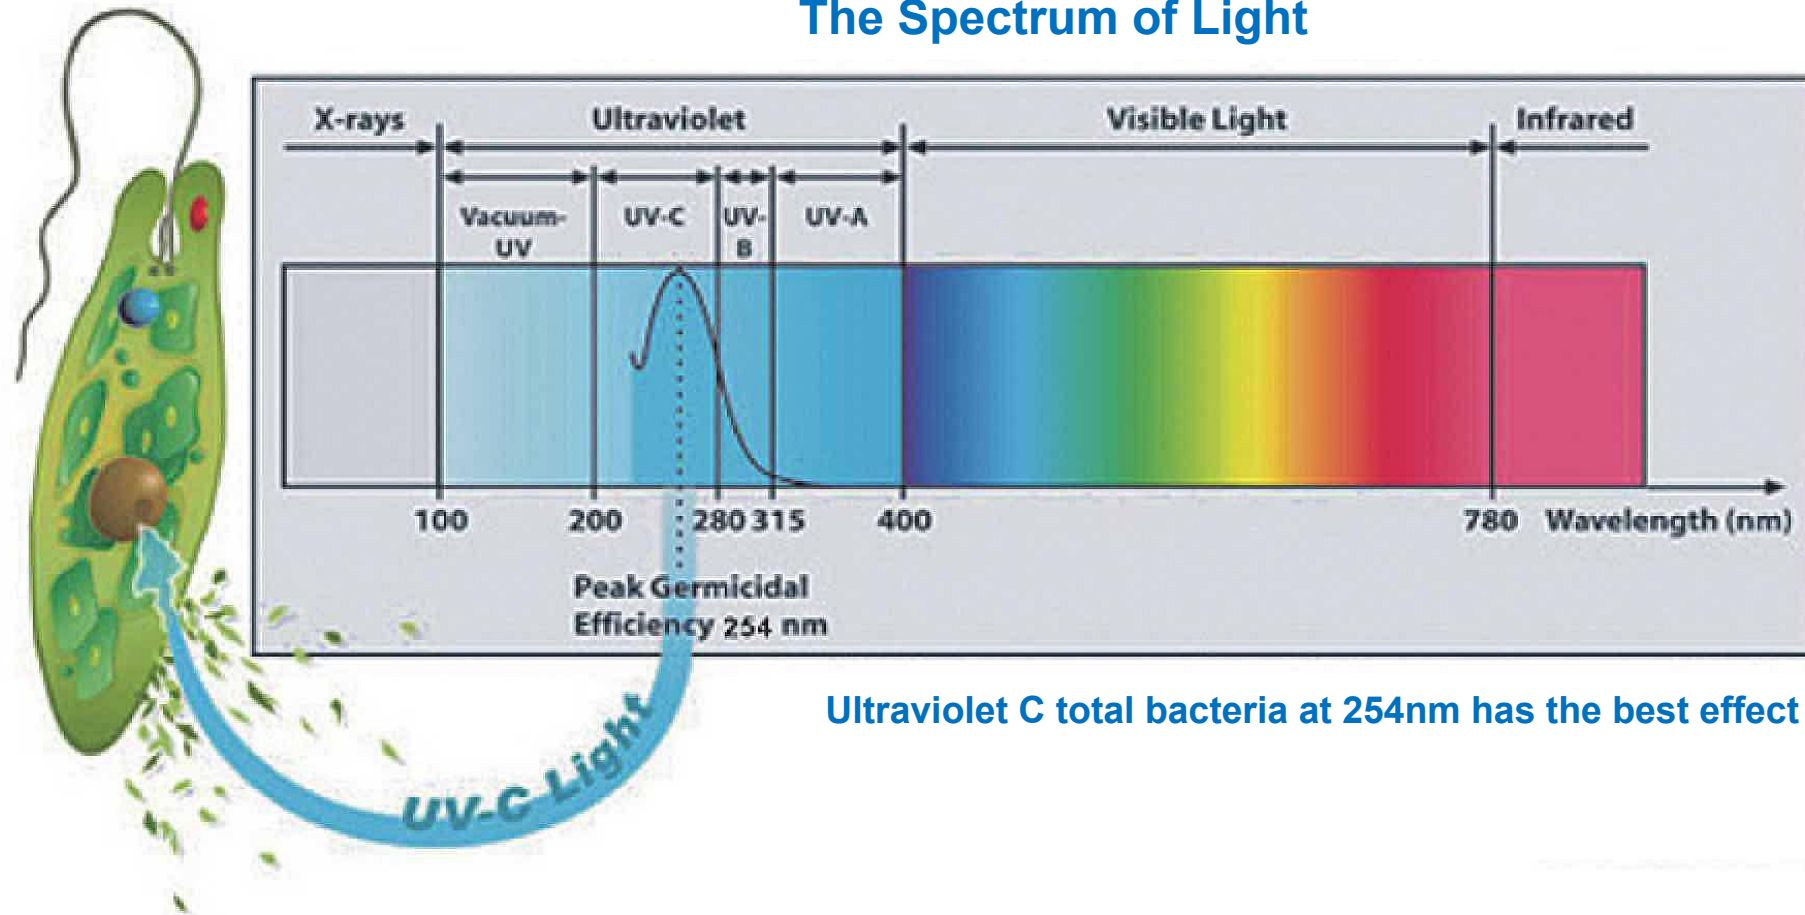

Application of cold cathode ultraviolet light life up to 20,000 hours, the effect is much higher than conventional light sources, power consumption is only 20% of the tube lamp (incandescent lamp), saving 80% of energy consumption.

UVC

UVC (short-wave ultraviolet-200 ~ 275nm wavelength) effectively destroys bacterial DNA and RNA through strong photochemical action, quickly kills microorganisms and prevents repair and regeneration.

The Spectrum of Light

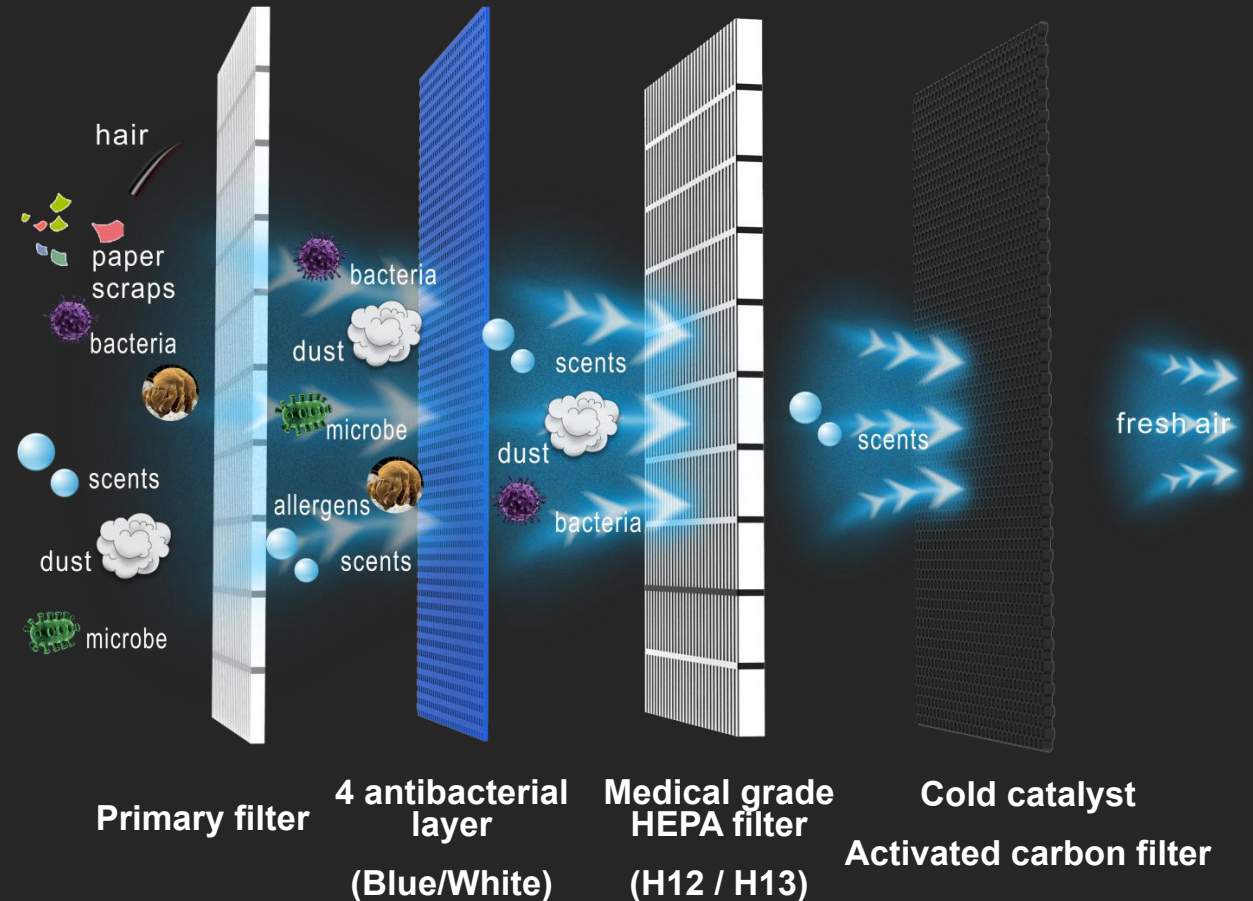

Ultraviolet C total bacteria at 254nm has the best effect

High-efficiency filter element system

4 antibacterial layer: antiallergic, antibacterial, antifungal, antiviral

Medical grade HEPA filter layer: 0.3 micron pollutant filtration effect range 99.5% ~ 99.97%

Cold catalyst activated carbon: Effectively decompose harmful pollutants

High-efficiency filter element system

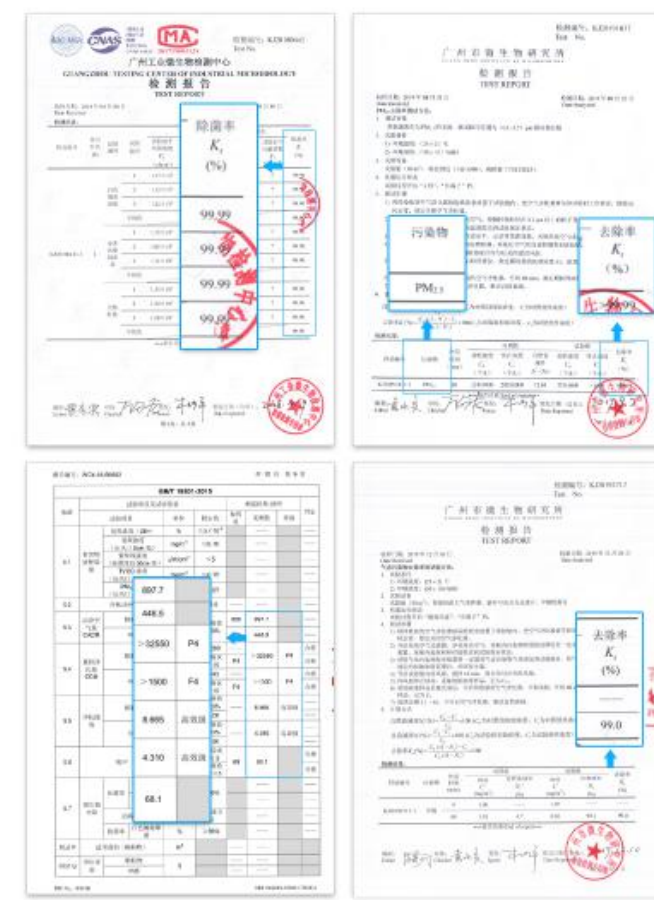

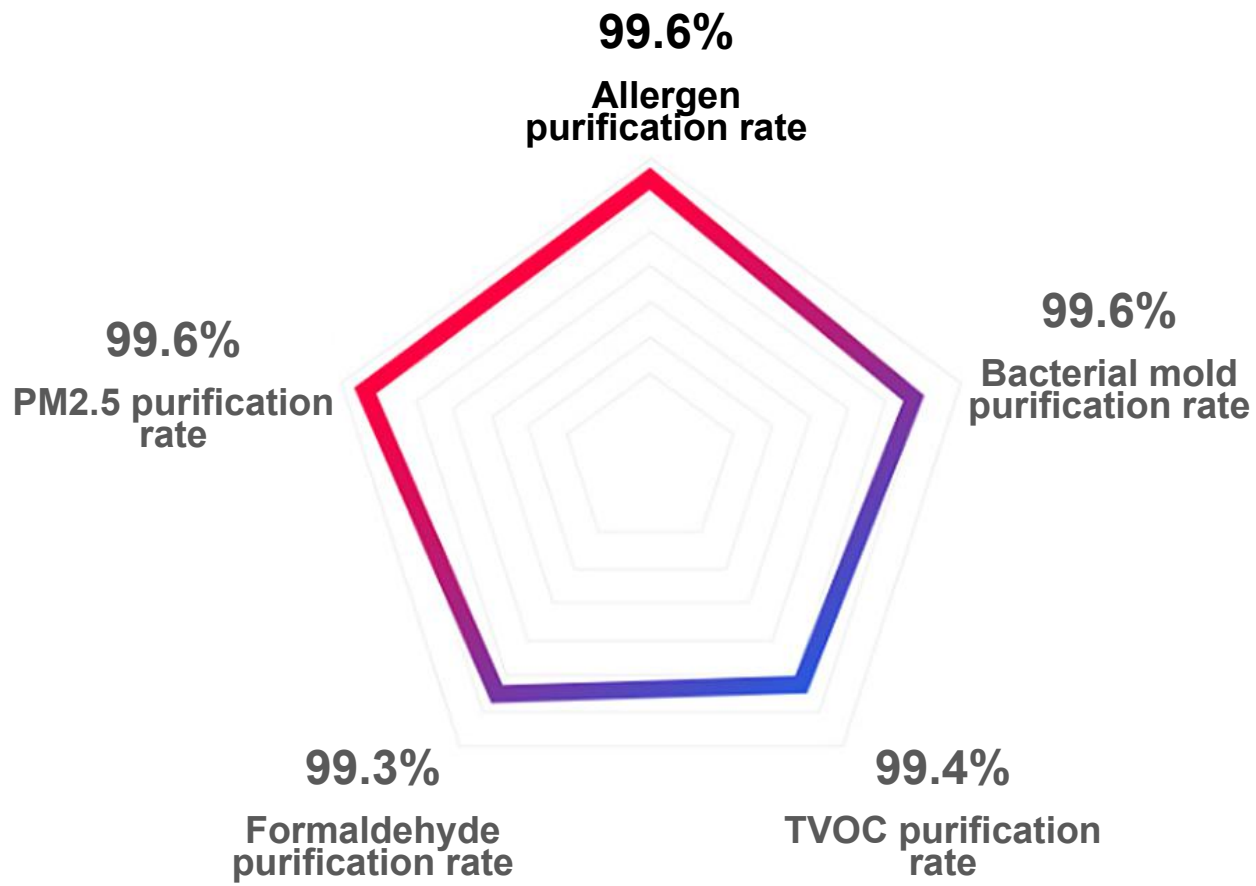

4 antibacterial layer: antiallergic, antibacterial, antifungal, antiviral

Medical grade HEPA filter layer: 0.3 micron pollutant filtration effect range 99.5% ~ 99.97%

Cold catalyst activated carbon: Effectively decompose harmful pollutants

Scientific test data

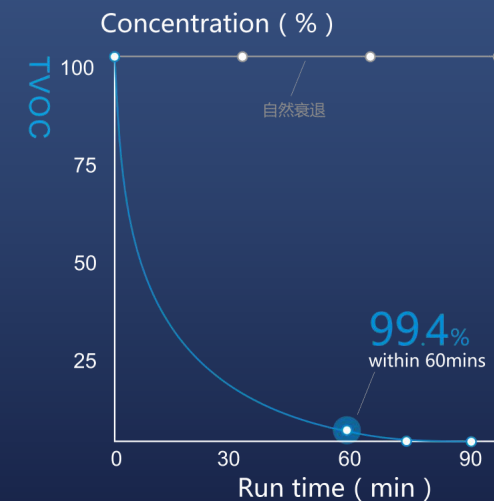

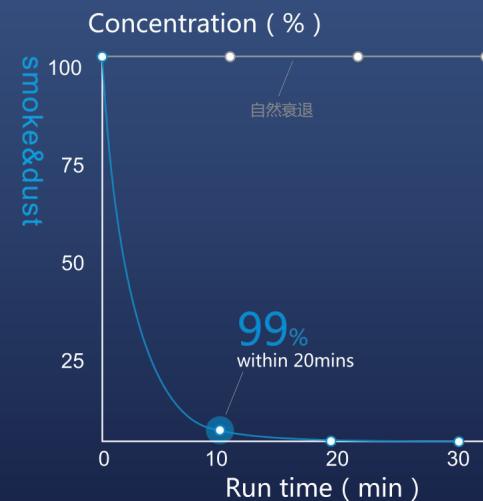

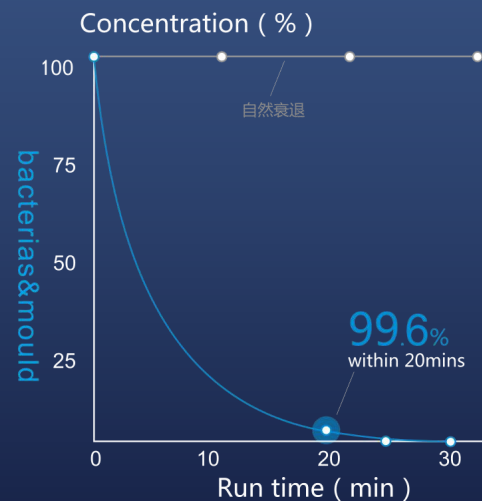

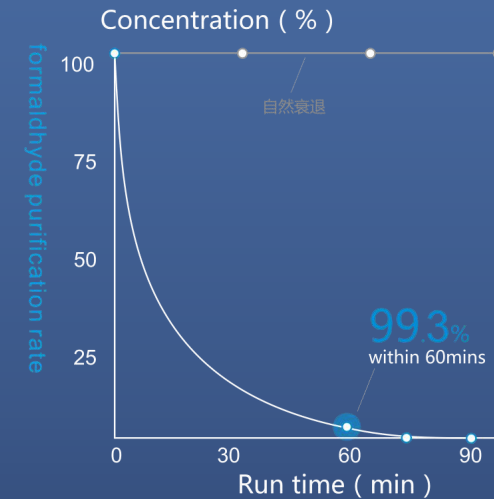

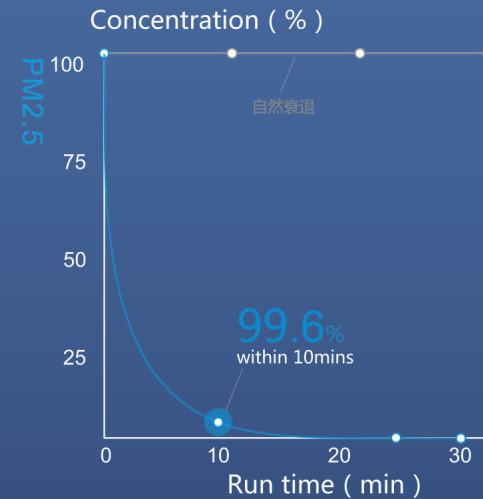

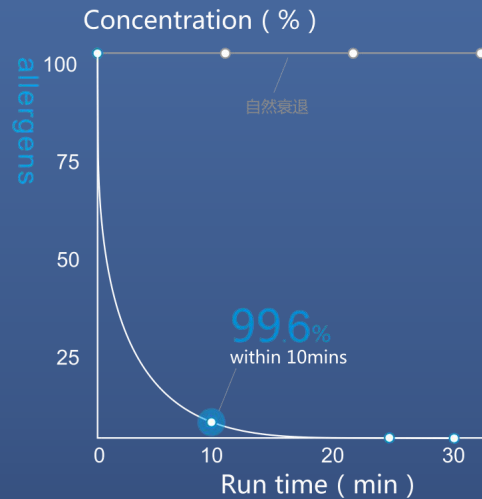

The professional purification test by an authority shows that it only takes 10 minutes! The concentration of major air pollutants has dropped significantly

High-speed cruise purification effect

Professional testing by authoritative organizations shows that it only takes 10 minutes!

Air pollutant concentrations have dropped significantly

Air purifier · Patented Technology

Patent number: ZL20142201579125

The air purifiers are equipped with efficient and powerful motors, and the oblique flow wind wheel forms a new 360-degree circulating large air flow, which can make the air purification form the maximum air volume with the minimum noise, and achieve comprehensive purification of every corner of the indoor space.

AIR Purifier

THE FOREMOST OF NATURE

Model: KJ400G-B

Power: 45W

Voltage: 100-240V~

Configuration: high-efficiency and powerful motor, diagonal flow wheel, high-efficiency composite filter, ultraviolet sterilization, negative ions, pm2.5 sensor/display, filter life

Area: 28-48m²

Dimension: 28*28*71cm

CADR (pm2.5) : 400m³/h

Loading

7.3/9.7_{kg} 28x28x71_{cm}

N.W./G.W.

DIMENSION

DC 24V 2A

RATED VOLTAGE
